

A requirement for restriction has been made under 35 U.S.C. 121. Two distinct inventions have been identified by the two sets of claims shown below:

I. Claims 1-6, drawn to a "touch panel display" with specific structural details directed toward the different layers and properties of the materials (for example coloration of non-transparent conductive coating and dielectric material) in the touch panel display as illustrated in figure 1, items 1--12, classified in class 345, subclass 173..

II. Claims 7-12 and 13-20 are drawn to "a handheld device" which has a specific type of carrier frame which is mounted in specific detailed way in the handheld device, as illustrated in figures 6 and 7, items 64 and 70 and figure 8 and 9 classified in class 361, subclass 686 or class 211, subclass 41.17.

In order to comply with the requirement for restriction, the Applicants elect set II (Claims 7-12 and 13-20), without traverse.

Respectfully submitted,

WAGNER, MURABITO & HAO
